Summary

Frontend Developer with 6+ years of experience building scalable web applications using React and TypeScript, with a strong focus on performance, maintainability, and user experience.

I have led frontend initiatives end-to-end, from shaping requirements to delivering production-ready solutions across web and mobile contexts. I'm comfortable taking ownership of frontend architecture, driving technical decisions, and ensuring consistency across products and teams.

I enjoy mentoring developers, collaborating closely with product and design, and continuously improving how frontend systems are built, scaled, and maintained.

Technical Expertise

Core: React, Next.js, TypeScript, JavaScript (ES6+), Vue

State Management: Redux

UI & Frontend: HTML, CSS, responsive design, animations, accessibility best practices

Testing: Jest, Vitest, React Testing Library

Tooling & DevOps: Vite, Node.js, Docker, Git, GitHub Actions (CI/CD)

Integrations: REST APIs, WebSockets, Keycloak

Backend & Data: Node.js, MySQL

Design Collaboration: Figma

Work Experience

Frontend Developer

Feb 2025 – Present

BHOUT

- Led the development of a cross-platform web application integrated with mobile apps via WebViews, aligning web and mobile experiences and ensuring reliable communication between platforms
- Owned the frontend architecture for key products, making decisions around structure, performance, and scalability
- Designed and implemented interactive TV display interfaces used across multiple physical club locations
- Led the redesign and redevelopment of the company website using React, Next.js, and TypeScript, improving performance, SEO, and maintainability
- Established and promoted best practices around performance optimization and accessibility (WCAG)
- Collaborated closely with product and design stakeholders to define requirements and deliver scalable, user-focused solutions

Full-stack Developer

Jul 2019 – Jan 2025

Nearshore Portugal, Lisbon

- Delivered and maintained client-facing applications using Vue.js and Node.js across multiple projects and domains
- Took ownership of frontend features from concept to delivery, ensuring code quality, usability, and performance

- Contributed to UI/UX decisions and implemented responsive, user-focused interfaces in collaboration with design teams
- Worked across the stack using Ruby on Rails, JavaScript, and jQuery in complex production environments
- Supported the development of scalable educational platforms using the Adapt Framework

Internship

Sep 2015 – Jul 2016

Lusíadas, A.C.E., Lisbon

- Supported integration and system monitoring using TIBCO in enterprise environments
- Analyzed and tracked incident resolution across internal platforms
- Developed understanding of distributed systems and service dependencies

Projects

EPIK

Feb 2018 – Sep 2019

- Developed a desktop application for educational game creation using React
- Built a backend service using Node.js as part of a Master's thesis

Education

Master's Degree in Computer Science

2016 – 2019

Faculdade de Ciências e Tecnologia da Universidade Nova de Lisboa

Bachelor's Degree in Computer Science and Multimedia

2012 – 2016

Instituto Superior de Engenharia de Lisboa
